

IPD IS HERE TO PUMP YOU UP!

Introducing the first water pump engineered, manufactured and tested by IPD - #4160610, made specifically for the Caterpillar 3500.

You have probably experienced many mediocre, substandard water pumps that have leaked or otherwise failed. We felt one of the components we could improve upon was the water pump #4160610 (previous number 2128177). We set our teams to work. Our in-house engineering team used the most advanced 3D scanning and CMM technologies to create this precision pump. We insisted on only new and the highest quality materials and components including:

- Precision machined, cast iron housings and impellers
- Precision machined steel shafts and bronze thrust washers
- Ceramic, spring loaded water seals
- Teflon lip-type hydrodynamic oil seals

The signed tag proves every pump is personally inspected

Every Pump is 100% Inspected and the Tag is the Proof!

Each of these 3500 water pumps is inspected by IPD's quality assurance team – they even come with a signed tag so that you know it's been tested for leakage, pressure and flow.

IPD IS COMMITTED TO BEING THE QUALITY LEADER IN ENGINE PUMPS

Strong banding around each box means your pump arrives in perfect condition

Protective cone and cap keeps debris out

Custom foam inserts cushion pump for ultimate protection

What also sets this IPD water pump apart from our competition is IPD's new innovative and revolutionary packaging that ensures these new pumps arrive in perfect condition!

- Recyclable, plastic IPD-branded caps protect the bearings during shipping and minimize debris inside pumps
- Rigid, custom-fit foam inserts provide total protection and keep the pump snug versus typical water pumps that arrive in shredded cardboard
- Custom banding around the box means the packaging looks better and lasts longer

IPD is Committed to Being the Quality Pump Leader

This is just the beginning. This 3500 is the first out of many new water and oil pumps IPD is developing and manufacturing in 2020. Coming soon in the pump pipeline:

Item Number	Description
2279850	Auxiliary water pump for the G3300
3362213	Water pump for the C15/C18
1727764	Water pump for the 3300
3520200	Water pump for the C27/C37
3520211	Water pump for the C15

Various oil pumps are in development as well. This 3500 water pump is one of the most versatile pumps and can be used in multiple applications including off-highway, power generation, marine, construction, oil and gas compression.
